

The raX is a product of the FUNA® brand from BOGA GmbH. It is used to nebulise disinfection products from the FUNA® RS family for aerogenic disinfection and sanitation.

The effectiveness of the raX and FUNA® RS05 systems has been tested in accordance with prEN17272.

The volume-based and quantity-proportional control QBE (quantity-based extraction) enables reproducible process cycles in validated rooms.

The raX is operated on the nebuliser's touchscreen or with a WLAN-enabled device with a browser.

Security: password-protected operating concept on several levels

Specification

- Trolley with smooth-running rollers and locking function
- Lockable doors
- Spiral cable (length: 4 m) for mains supply 90-305 V-AC / 47-63 Hz
- Precision nebulisation with QBE (quantity-based extraction)
- HMI: touchscreen or mobile device
- Data logging of events and disinfection quantities
- Data export option

Technical Data

Max. nebulisation output *	2000	ml/h
Number of transducers	4	pieces
Power consumption	255	VA
Circulating air volume	568	m³/h
Fluid container (canister)	10	l

* with demineralised water

Dimensions

Installation dimensions housing height x width x depth	1250 x 790 x 600	mm
Weight (including fluid canister with 10 liters)	62,5	kg

Conditions of use

Power supply	90-305 / 47-63	V / Hz
Ambient temperature	5...45	°C
Ambient temperature	0...90	% rF

Scope of delivery

- Precision nebuliser raX
- Two keys for door lock
- 10l canister with FUNA® RS05 disinfection product
- Suction lance
- Operating instructions
